## Body Care - Creams

---

### Artemisia Moon Cream

Artemisia Moon Cream is based on our natural emulsification and conditioning system that includes Sodium Behenyl Lactylate (SBL), Behenyl Alcohol, Stearic Acid and VenaSilk. We have combined our natural emulsification system with Shea Butter, Meadowfoam Oil, Abyssinian Oil and our Botanical Complex LSC for optimum skin softening, conditioning and moisturization. Artemisia Hydrosol is utilized as the entire water phase in this formulation and lends its aromatic and spiritual qualities to this lovely cream. Clary Sage essential oil and Artemisia Hydrosol combine well in this balancing and rejuvenating cream.

	Ingredient	Amount
Part A		
	Artemisia Hydrosol	71.5% = 357.5 grams
	VenaSilk	2.0% = 10 grams
	Glycerin	1.0% = 5 grams
Part B		
	Sodium Behenoyl Lactylate (SBL)	2.0% = 10 grams
	Behenyl Alcohol	2.0% = 10 grams
	Stearic Acid	2.0% = 10 grams
	Shea Butter	12.0% = 60 grams
	Meadowfoam Seed Oil	2.0% = 10 grams
	Abyssinian Oil	2.0% = 10 grams
	Botanical Complex LSC	2.0% = 10 grams
Part D		
	Optiphen	1.0% = 5 grams
	Clary Sage Essential Oil	0.5% = 2.5 grams
	Total:	100% = 500 grams

Part A: Combine Glycerin and VenaSilk and set aside. Heat Artemisia Hydrosol s to 170 - 175F. Add VenaSilk/Glycerin to heated hydrosol and mix.

Part B: Combine ingredients and heat to 175F. Add Part A to B with mixing. Cool to 50C/122F (or less), add Part D and mix well until completely cool.

#### Notes:

- Other Hydrosols and Essential Oils can be used if desired.
- Other Vegetable Oils if desired. Shea Butter can be replaced with other butters, such as NatraButter, if desired.
- Optiphen can be added to the water phase, but may disrupt the formulation. We have better success when adding it to the cool-down phase.
- High shear mixers such as a stick-blender can be used to create a thicker cream. Our Mini-mixer can be used for tiny batches of 250g or less. Propeller mixers or beaters or a hand-held whisk can be used to create a thinner cream.
