

THE HERBARIE FORMULARY

Body Care - Creams

Herbarie Botanical Cream with Rose Geranium & Ylang Ylang

The Herbarie's Botanical Cream offers the best in moisturizing botanicals and skin conditioning emollients that leave skin silky soft. Plantago Extract is one of the best of the skin care botanicals. It brings skin smoothing and soothing nutrients, as well as humectant characteristics, to this formulation. Our Herbarie Rose and Melissa Hydrosols are excellent additions to any skin care regimen. For the ultimate in skin care benefits, these lovely distillates can be used as the entire water phase of the formulation. BTMS-Conditioning Emulsifier forms the emulsification system. BTMS-Conditioning Emulsifier is responsible for much of the conditioning and the silky soft feel of this formula. A perfect blend of rich oils and butters bring emolliency and conditioning to skin while leaving skin satiny smooth.

This formula was created by using percentages and weight measurements in grams. For those who are just beginning to make toiletries, you may use the approximate fluid/dry measurements as listed.

This is one of my favorite cream formulas.

Ingredient	Amount	
Part A		
*Distilled Water	46%	= 230 grams = 1 cup + 2 TBS
Rose Hydrosol	10%	= 50 grams = 1/3 cup
Melissa Hydrosol	10%	= 50 grams = 1/3 cup
Plantago Extract	10%	= 50 grams = 1/4 cup
Part B		
BTMS	8%	= 40 grams = 5 TBS + 2 Tsp
Olive Squalane	2%	= 10 grams = 3 teaspoons
Abyssinian Oil	4%	= 20 grams = 4 teaspoons
Meadowfoam Seed Oil	2%	= 10 grams = 2 1/2 teaspoons
Shea Butter	6%	= 30 grams = 2 tablespoons
Part C		
**Rose Geranium/ Ylang Ylang		
Essential Oils (1/1 ratio)	1%	= 5 grams = 1 teaspoon
Cosmocil CQ	1%	= 5 grams = 1 1/2 teaspoons
Total:	100%	= 500 grams = about 2 cups

Heat Part A to 175F. Heat Part B to 175F. Add Part B to A with mixing. Cool to 120F or less, add Part C and mix well.

Notes:

-For added skin benefits, Distilled Water can be replaced with additional hydrosols if desired.

-**Other skin safe essential oils may be substituted
